PROFILE SUMMARY

Full-cycle Unity Game Developer with 5+ years of experience taking mobile games from concept to live product — including 3 shipped titles with 20K–50K combined Play Store installs. Specializes in casual and multiplayer game development, with deep hands-on expertise in real-time systems (Photon, Socket.IO), physics-driven puzzle mechanics, ad monetization (AdMob, AppLovin, AppsFlyer), and native iOS/Android plugin development. Equally comfortable architecting core gameplay systems, integrating backend services, optimizing for low-end Android hardware, and owning full deployment pipelines. Has worked across Web3 (Polygon blockchain), social features, and live game operations. Proven track record of mentoring junior developers and leveraging AI tooling (GitHub Copilot, Gemini, ChatGPT) to ship faster without compromising code quality. Looking to bring end-to-end ownership and a shipping mindset to a high-growth mobile gaming team.

WORK EXPERIENCE

Vapronix Web Pvt Ltd | Unity Game Developer | *Feb 2025 – Present*

- Co-developed and shipped 3 mobile titles to Google Play (IMHO, Word Meadows, Arrows Go) achieving **10K–50K combined installs**.
- Engineered grid-based crossword algorithms and physics-driven puzzle mechanics as equal contributor alongside one other Unity developer.
- Integrated anonymous messaging protocols and real-time social features into the IMHO application.
- Built **custom native plugins for iOS (ObjC) and Android (Java)** to enable direct image sharing to Snapchat from within IMHO — no third-party SDK dependency.
- Integrated AdMob, AppLovin, and AppsFlyer for ad monetization and user attribution across shipped titles.
- Optimized C# scripts, reduced draw calls, and profiled memory usage to ensure stable frame rates across diverse Android and iOS devices.
- Leveraged GitHub Copilot, Gemini, and ChatGPT to automate boilerplate scripting and accelerate iteration cycles.

TRIKON Ecosystem LLP | Senior Unity Developer | *Dec 2023 – Feb 2025*

- Architected and published a custom Unity plugin for Polygon blockchain (Web3) wallet integration, enabling seamless in-game transactions.
- Built Ridge Valley, a Web3-enabled 3D driving game inspired by Hill Climb Racing, with NFT-driven wardrobe systems and token-earning mechanics.
- Developed a Web3-based third-person shooter with custom Polygon blockchain integration for in-game asset ownership and transactions.

Deftsoft Informatics Private Ltd. | Unity Game Developer | *Aug 2020 – Dec 2023*

- Developed real-time multiplayer experiences supporting up to 20 concurrent users using Photon and Socket.IO across Ludo and casino-style games.
- Built 2D and 3D game systems following SOLID principles with HDRP rendering and custom Shader Graphs for enhanced visual fidelity.
- Integrated REST APIs, Firebase, social logins, in-app purchases, and backend database connectivity across multiple shipped titles.
- Implemented unit testing using Unity Test Runner, NSubstitute, and Zenject; managed assets with Addressables for optimized load performance.
- **Mentored junior developers** through code reviews and pair programming, improving team code quality and delivery speed.
- Managed source control and collaborative workflows using Git across team of 2–5 developers.

SKILLS

Engine	Unity 2D / 3D, HDRP, Addressables, Editor Scripting, DoTween
Languages	C#, OOP, SOLID Principles
Multiplayer	Photon PUN, Socket.IO, Vivox Voice Chat
Backend	REST APIs, Firebase, Social Login, In-App Purchases
Monetization	AdMob, AppLovin, AppsFlyer
Native Plugins	Custom iOS & Android plugins (C#/Java/ObjC bridging)
Web3	Polygon Blockchain, Custom Plugin Development, NFT Systems
Testing	Unity Test Runner, NSubstitute, Zenject, Debugging, Profiling
Tools	Git, GitHub Copilot, ChatGPT, Gemini, Animation Rigging, Character Customization
Platforms	Android, iOS, Google Play Store deployment

EDUCATION

Bachelor of Technology in Computer Science

Swami Keshvanand Institute of Technology, Management & Gramothan | 2020
